MODULE -3
Question Bank

Sl. No.	Questions	COs
1.	Give the Comparison between Structured & Unstructured data Format.	
2.	Explain about Offload decision making and considerations in processing offloading paradigm.	
3.	Discuss about IOT device design and selection considerations.	
4.	Explain Event detection using an Collaborative Processing Topology.	
5.	Explain about various data generating and storage sources connected to the Internet with a neat diagram.	
6.	Outline an IoT deployment (processing offloading) with the various layers of processing involving different application domains with a diagram	
7	With a neat diagram explain onsite processing topology.
