

Computer Organization & Architecture-SIMP-22

-TIE review team,ECE

Module wise SIMP Questions

Module-1

1. With a neat diagram explaining basic operational concepts of computers
2. Explain Bus Structures(single and Multiple) in computer
3. Write a note on Big-Endian and Little-Endian assignment.
4. Explain the basic performance equation.
6. Write a short note on subroutine and parameter passing
5. Different types of instruction format

Module-2

1. What is an addressing mode? Explain different types of addressing mode with ex.
2. Write a short note on assembler directives
3. Explain shift and rotate operations with example
4. Explain stack operation with example
5. Write a short note on subroutines

Module-3

1. Explain operation of DMA with a neat diagram
2. Write a note on interrupts? Explain different ways of enabling and disabling interrupts
3. Explain daisy chain and priority structure
4. Explain program controlled IO

Module-4

1. With a neat diagram, explain the Internal organization of 2M*8 Dynamic Memory chip
2. Explain the internal organization of 16*8 Memory chip
3. Explain Virtual memory organization
4. Explain secondary storage devices
5. Define cache memory, explain various types of it with a neat block diagram.

Module-5

1. Describe Multiple Bus Organizations of CPU with neat block diagrams. (also its advantages)
2. Write down the control sequence for the execution of the instruction Add (R3), R1.
3. Discuss with neat diagram, the single bus organization of data path inside a processor
4. Explain Hardwired Control unit organization in a processing unit. (with diagram)
5. What do you mean by micro-instruction? Design Basic Organization of a micro programmed control unit with diagram.
