

IoT for Smart Infrastructure (BEC358D) Question Bank

1. What is the full form of ICT? (**Information and communication technology**)
2. Which of the following layers provides end-to-end communication?(**Transport layer**)
3. Which of the following devices are used to measure the gases and liquids? (**Pressure sensor**)
4. Which interface does the finger print sensor use? (**UART interface**)
5. Which of the following topology is used for zigbee smart energy? (**Star topology**)
6. Primary use of MQTT is _____ (**Machine to machine communication**)
7. How many types of capacitive touch sensors are in IOT?
8. Which of the following touch sensors is used in cell phone? (**Capacitor touch sensor**)
9. Which of the following is the example of a short-range wireless network?(**Wi-Fi**)
10. What is the frequency rate of z-wave? (**908.42GHz**)
11. Total installed power generation of Gujarat in 2020 is_____ MW (**3,273**)
12. Which city tops list of 27 new smart cities announced by ministry of urban Development?(**Amrithsar**)
13. Which of the following, has got first city nomination for smart city project I south India.(**Puducherry**)
14. A smart city improves_____ (**Quality of life, Health and safety ,social, economic and cultural growth**)
15. Which of the following is/are part of economic infrastructure of a smart city?(**IT parks**)
16. Who won “smart city of 2018” at smart city expo world congress?(**Singapore**)
17. ITS stands for_____(**Intelligent Transportation service/system**)
18. Intelligent building is one that provides a _____effective environment.(**Productive and cost**)
19. The basic elements of an intelligent building are_____(**Structure, systems, services and management**)
20. Parameter of intelligent building is a_____(**Functional aspects, planning design and construction, security and communication systems**)
21. _____is the technology of indoor and vehicular environmental Comfort.(**HVAC**)
22. Intelligent building in India is_____(**Techno-campus of cognizant technology, Tidal park Chennai, TCIL bhavan, New delhi,**)
23. DUAC is a_____(**Delhi urban art commission**)
24. Identify the incorrect advantage of IoT.(**security**)
25. Total types in which IoT platform is divided. (**4**)

IoT for Smart Infrastructure (BEC358D) Question Bank

26. The national highways system is the responsibility of _____ (**Central Government**)
27. Multimodal transport, road condition monitoring etc., are included in which of the following objective of smart cities. (**Smart mobility**)
28. Which among is the real example of a smart grid device in IoT. (**Smart metres**)
29. Smart grid technology compresses of _____ (**AMI-PLM, OMS, renewable integration microgrid, DR/DSM, Distribution, Automation, Energy**)
30. In a grid eco system, a normal consumer is expected to be able to turn to
31. POWERGRID has demonstrated the smart grid technology capabilities in collaboration with various solution providers at _____ (**Puducherry**)
32. "Making the master grid" may be achieved by replacing traditional analog components with digital ones and incorporating the computing, IT, sensors and other equipment in electric supply system. (**True**)
33. AMI stands for _____ (**Advancing metering Infrastructure**)
34. Electric vehicles plugged into the grid during peak usage time (**True**)
35. Smart meter is an important element in building the smart grid these advanced metres (**True**)
36. PLM stands for _____ (**Peak load management**)
37. What are the main tasks of ISGF? (**All of the above**)
38. Which of the following means of transportation is most important environment friendly. (**Bi-cycle**)
39. _____ - is the water mode of transportation system. (**Ro-Ro**)
40. Smart grid is also known as energy internet. (**True**)
41. "ISA 100.11A" is a wireless networking technology standard. ISA stands for (**International society of Automation**)
42. Industrial IoT (IIoT) is one of the fastest and largest segments in the overall IoT space by the number of connected things. (**True**)
43. Which of the following is not a difference between traditional data center and cloud computing (**Storage**)
44. Which of the following is not a component of cloud computing? (**Local servers**)
45. The distance measuring sensor module is _____ (**HC-SR04**)
46. The following is the component in a typical sensor network. (**All of these**)
47. In _____ a node / network is connected to multiple networks for improved reliability. (**Multi-homing**)
48. The IPV4 notation uses _____ number of bits. (**32**)

IoT for Smart Infrastructure (BEC358D) Question Bank

49. A device which detects or measures a physical property and records indicates or otherwise responds to it is_____ (Sensor)

50. State whether the following statement is true or false:

“The more is the resolution of a sensor, the less accurate is its precision:((**False**)
